

Citrix – Netscaler Application Delivery Seminar

Make your Web applications scream—Not your users. And give all that web App traffic the highest levels of Security.

Citrix NetScaler makes any Web application run up to 15x faster for anyone, anywhere - Securely.

Your employees want to increase application speed and performance, not their blood pressure. With Citrix® NetScaler® application delivery systems, you can provide the level of performance they demand with the security they need and the scalability for your future business requirements.

- Reduce TCO
- Accelerate the delivery of Web applications up to 15x
- Deliver high-performance load balancing and layer 7 content switching to ensure fast, reliable application access
- Protect business-critical applications from malicious attacks
- Provide secure, accelerated application access for remote users

Who Should Attend?

- * Application Development Dept
- * Network & Infrastructure
- * Security Department
- * e-Business & Web Unit Managers

We Can Bring You Up to Speed!
