

WAN & Web Application optimisation and security.

The three 'Ss' of Application Delivery;

Speed
Secure
Simplify

Seminar Invitation

60 million users of Citrix in 160,000 companies can't be wrong!

Citrix WANScaler v4.1; It's true, you CAN accelerate application performance across wide area networks (WAN) by an average of 5x to 30x (up to 300x at peak compression efficiency). Give your branch office End Users LAN-line application performance over the WAN.

Citrix® NetScaler® v8; Customers won't wait for you or your web application, they'll go elsewhere. With Citrix Netscaler you can give them the service they expect (x5 Web Apps. performance) and at the same time increase application security (Web Application Firewall), availability, visibility and reduce your datacenter costs.

Citrix Access Gateway™v8 (Enterprise Edition) is the only SSL VPN to securely deliver any application with policy-based SmartAccess control. Access Gateway helps organisations to cost effectively meet the 'anywhere access' demands of all workers – enabling flexible work options, easier outsourcing and non-employee access, and business continuity readiness – while ensuring the highest-level of information security, optimisation and cost reduction.
